A SPRINGBUK USF CASE

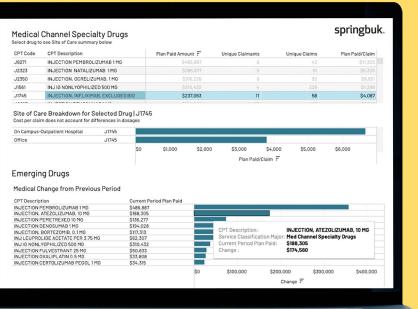

Analytics Navigator

Discover a Deeper Path to Your Specialty Drug Data Destination

Employers look to their data as their compass - helping point them in the right direction and easily navigate their path to the answers they need. But when you want to dive deeper into your specialty drug data, you may find that you don't have the skillset to build complex queries or understand which areas to explore.

You have Springbuk's curated data insights. Now, you can have more perspective and context of the stories your data hold.

Analytics Navigator is a suite of dynamic and interactive analytic tools that help take your data exploration to the next level so you can slice and dice the data as you want - with just a few quick clicks.

It equips you with deeper insights on recommended actions, including pre-defined, easily drillable data details and analysis around particular action items such as condition management, drug management, or financial risk.

Let's explore how you can gain a direct route to the information you need quickly, decisively, and with an informed perspective with Analytics Navigator.

Actionable Data Insights at Your Fingertips

Analytics Navigator empowers you to explore your data as you like, tailoring your path to surface information that piques your interest. For example, you and your benefit team might focus on keeping a close watch on members taking a specialty drug from both a care and cost perspective.

Upon launching Analytics Navigator, working in <u>Advanced Reports</u> environment, you can select your date filtering parameters, which can run on the recent rolling months or a custom date range you input.

Specialty Drug Overview

Rx		
	Previous Period	Current Period
Plan Paid Amount	\$5,949,324	\$5,500,747
Unique Claimants	96	109
Script Count	1,123	1,109
Plan Paid/Script	\$5,298	\$4,960
РМРМ	\$79	\$80
Plan Paid/Day Sup	\$166	\$139

With your date range selected, your data exploration truly begins. The Overview page presents a high-level summary of your members' specialty drug utilization, from both a medical and an Rx perspective, across various metrics:

- Check current versus prior period spend and utilization trends
- Review key performance indicators like PMPM, paid per script, paid per day supply
-) Identify monthly trends by claim type

Top Rx Drugs

Moving into the Top Rx Drugs page, it's here where you can review an interactive summary of the top Rx specialty drugs in your plan:

- You can also dig into which drugs have started to increase in spend compared to the prior period allowing you to keep a pulse on rising costs
- The Emerging Drugs module equips you with information on which drugs might be new to the market; this could lead to an opportunity to educate plan members, or get a head start on plan design strategies to address new budget busters

Top 15 Rx Specialty Drugs by Paid Amount

Drug Name	Plan Paid Amount	Unique Claimants	Script Count	Plan Paid/Script
HUMIRA(CF) PEN	\$1,046,514	11	123	\$8,508

Medical Channel Specialty Drugs

CPT Code	CPT Description	Plan Paid Amount	Unique Claimants	Unique Claims	Plan Paid/Claim
J9271	INJECTION PEMBROLIZUMAB 1 MG	\$576,894	4	19	\$30,363
J9264	INJ PACLITAXEL PROTBND PARTICL 1	\$114,649	1	26	\$4,410
J2507	INJECTION PEGLOTICASE 1 MG	\$102,996	1	10	\$10,300

Site of Care Breakdown for Selected Drug J9271								
On Campus-Outpatient Hospital	J9271							
		\$0	\$5,000	\$10,000	\$15,000	\$20,000	\$25,000	\$30,000

The Medical Channel Specialty Drugs page is where Analytics Navigator gives your benefits analytics a competitive edge:

-) Specialty drugs from your medical claims data are listed here, where you can then drill further into site of care
- The Site of Care Breakdown will automatically update and instantly summarize the potential cost differences between sites of care in you data
- This page also includes an Emerging Drugs module for you to review which medical channel drugs might be new to the market, with the potential to educate plan members or reveal opportunities for plan design changes

Specialty Drugs per Condition

Rounding the final turn in your journey, **Analytics Navigator allows you to drill even deeper and review on-demand condition breakdowns** on the **Specialty Drugs per Condition page** from multiple perspectives:

- From a population health perspective, if you were to select "Cancer with Active Management," the interactive module would first summarize and compare spend and trend at the population level
- Then, from a condition-specific perspective, the Specialty Drugs per Condition Group section shows the top drugs (both medical and Rx) for Cancer with Active Management
- Finally, providing a drug-specific perspective, you can click on the drug name and review what other conditions, at what frequency, are being treated by that drug
- This provides a holistic view of the downstream impact of drug-specific decisions

Seeing how different drugs can be used for multiple conditions makes these visuals powerful from a cost-saving perspective. It helps ensure your members receive the best care at the best price.

Access More Metrics, Data Points, and Visualizations

When you have access to information and tools that allow you to drill into your data, you're empowered to make decisions that solve today's problems and prepare for tomorrow's challenges.

Let us show you how **Springbuk can deliver the intelligence you need** to make the best decisions for your business and your people.
