Intelligence

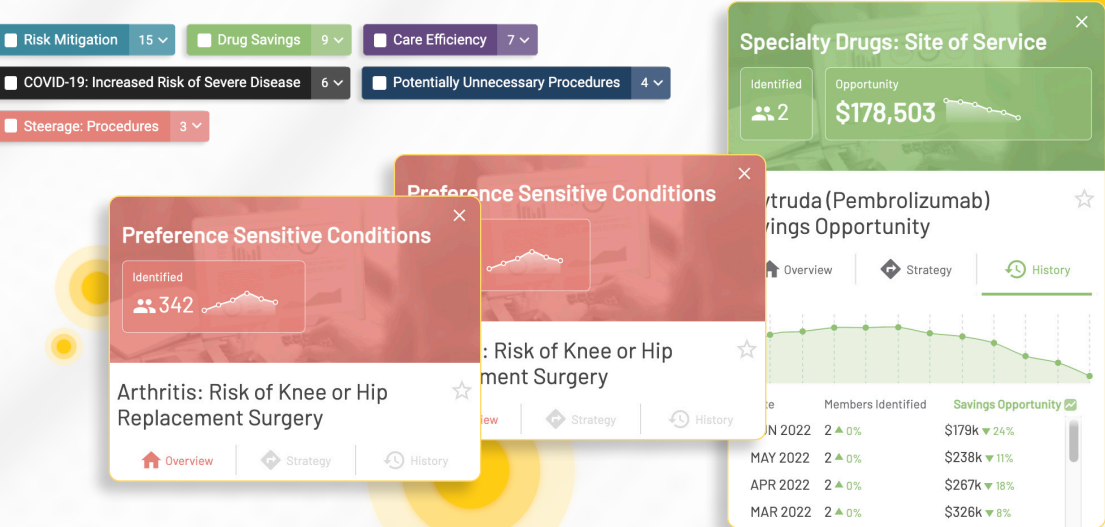

Experience the power of actionable insights extracted from your health benefits data. [The Springbuk Health Intelligence™](#) platform gives benefits leaders and HR professionals the direction they need to make confident plan design decisions, program selections, and track the success of benefits initiatives.

Springbuk Insights™ Curated Insights for Actionable Opportunities

[Springbuk Insights](#) goes beyond analyzing claims and wellness data; it generates actionable strategies and predicts members at-risk of conditions to more effectively guide disease management resources and risk mitigation strategies.

Insights distills your data and curates direction on the next steps you can act on today by:

- › Drive immediate impact through the identification of gaps in care
- › Identify patterns among your employee population
- › Uncover opportunities to avoid unnecessary procedures, recommend lower-cost drugs, mitigate risk, and improve the efficiency of care
- › Target populations that are at risk with preventive interventions

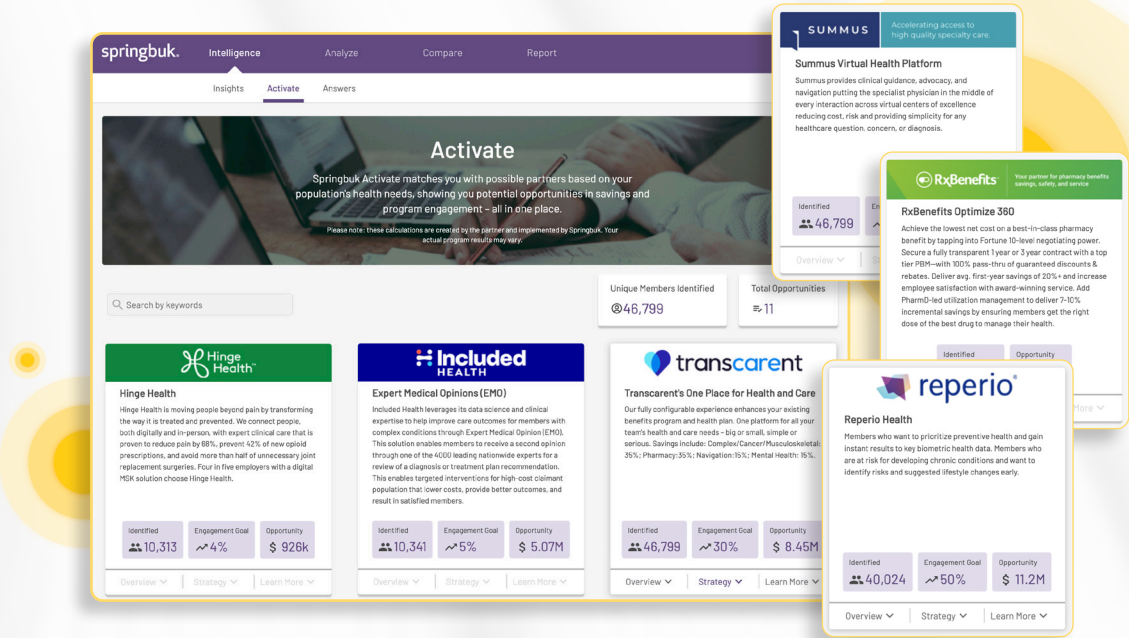

Springbuk Activate Unlocking Collaborative Opportunities & Powering Successful Outcomes

[Springbuk Activate](#) matches employers with potential partners based on their population's health needs, showing them potential opportunities in savings and program engagement – all in one place.

After using Springbuk Insights™ to uncover actionable opportunities, employers and their benefits advisors can turn to Activate to answer the question, **“Who or what can help me manage the opportunities that Springbuk has identified?”**

Activate is entirely data-driven – only the programs that qualify using your underlying data, such as medical claims or drug claims, are displayed because we use the specific member identification algorithm of each partner.

Intelligence

Springbuk Answers™ Answer Your Questions Instantly

Need to quickly know the answer about emergency room visits to evaluate a potential plan design change? Just type your question into [Springbuk Answers](#), a curated search tool that uses natural language processing to equip you with the right information to understand the story driving your data. **With Answers, it's never been easier to make the best decisions for your people and business confidently.**

Benchmarking External Benchmarks from Best in Class Sources

Springbuk uses a multi-faceted approach in providing benchmark comparisons. **We provide external benchmarks from leading vendors Optum and IBM Watson Health, each of whom have rich national normative datasets.**

By leveraging both of these assets, our clients get best-in-class national benchmarks that help them understand how their key performance indicators (including cost, quality, utilization, prevalence) stack up against national norms, as well as various segments (such as industry and geography).

Select Benchmarking Subjects

	Size	Date Range	Employee (%)	Spouse (%)	Dependent (%)	Male (%)	Female (%)	Average Age	Turnover Rate
Enterprise Client 1	36,571	Feb 01, 2023 - Jan 31, 2024	67%	11%	22%	61%	39%	36	41.2%
Springbuk	2,917,698	Feb 01, 2023 - Jan 31, 2024	52%	16%	32%	51%	49%	35	23.9%

Claims Summary

Current Medical % of Total Cost	Current Rx % of Total Cost	Future Medical % of Total Cost	Future Rx % of Total Cost	Current Total PMPM	Future Total PMPM	Current Total PEPPY	Future Total PEPPY
73.77%	26.23%	72.96%	27.04%	\$517.04	\$517.56	\$9,416.22	\$9,421.97
74.84%	25.16%	75.93%	24.07%	\$534.56	\$526.70	\$12,513.19	\$12,328.06

Top 10 Conditions

Enterprise Client 1

Condition	Cost Per Claimant Per Month	Cost Per Claimant Per Month	% Prevalence	% Prevalence	% Total Spend	% Total Spend
1 Diabetes	\$426.38	\$485.28	7.74%	5.56%	8.72%	6.25%
2 Ischemic heart disease	\$681.79	\$558.62	2.35%	1.86%	4.42%	2.42%
3 Psoriasis	\$1,744.16	\$1,284.44	0.89%	0.92%	3.01%	2.62%

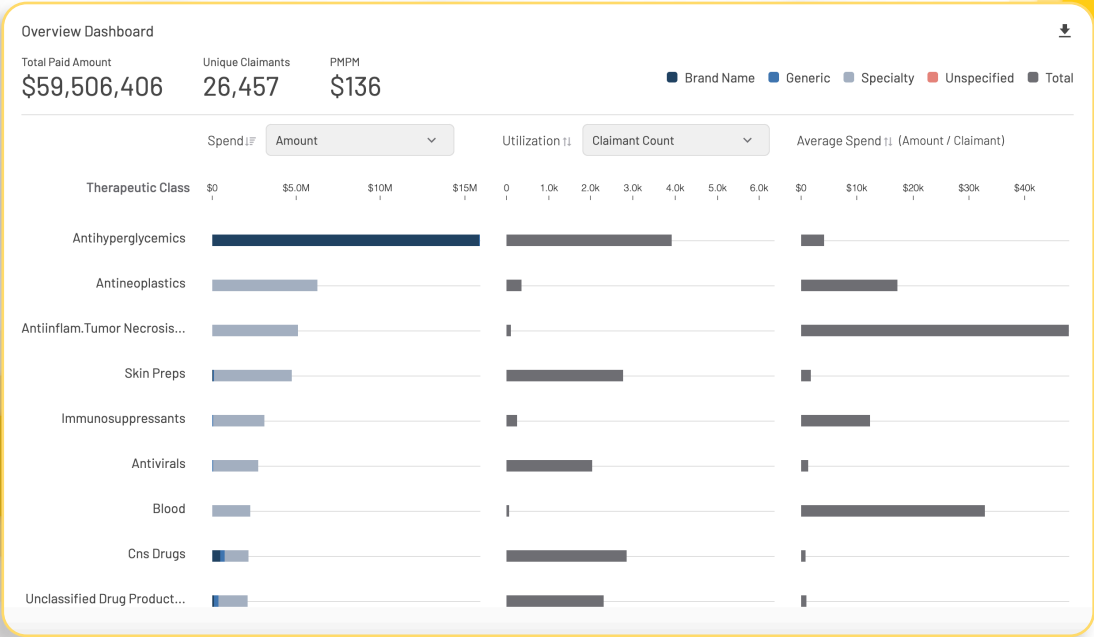

Analyze

Unlock the full potential of your health benefits investment with [Springbuk's powerful health analytics tools](#). By leveraging advanced health analytics, you'll gain a comprehensive understanding of your population's needs, empowering you to provide tailored plans and programs that resonate with your members at every step of their health journey.

Drug Class

Compare Spend with Analytic-driven Insights

- › Analyze key performance indicators for your pharmacy channel experience
- › Easily slice and dice data by therapeutic drug classifications
- › Filter to specialty drugs
- › Pre-defined drill paths to examine drug experience across service classifications including brand, generic, mail order, and retail
- › Review pharmacy experience for members who have specific conditions
- › Identify pharmacy spend high-cost claimants

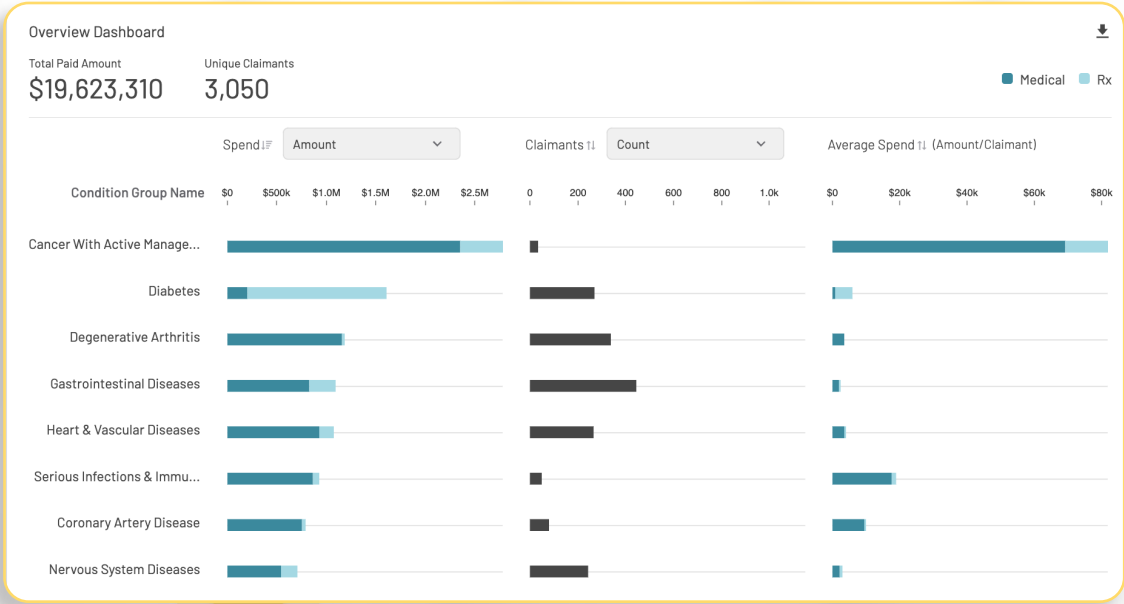

Condition Groups

Filter & Drill into Conditions Important to You

Interactive dashlets enable users to answer the following:

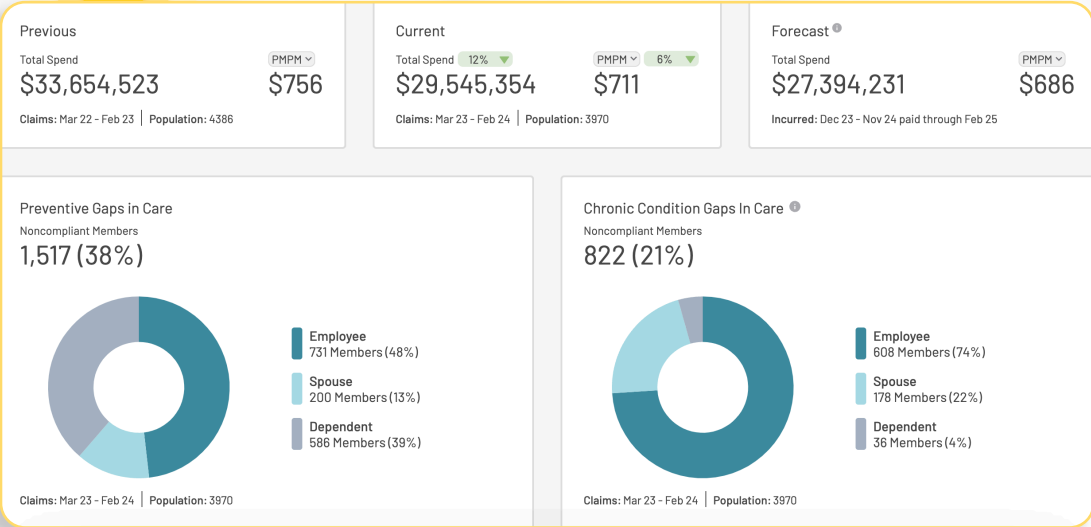

- › What are the top conditions or condition groups being driven by each service category?
- › What are the top claimants for each service category?
- › What are the top prescription drugs included in a specific condition/condition group?
- › What are the top medical procedures included in a specific condition/condition group?
- › What are the top diagnoses for a specific condition/condition group?

Analyze

Health HQ A High-Level View of Your Population

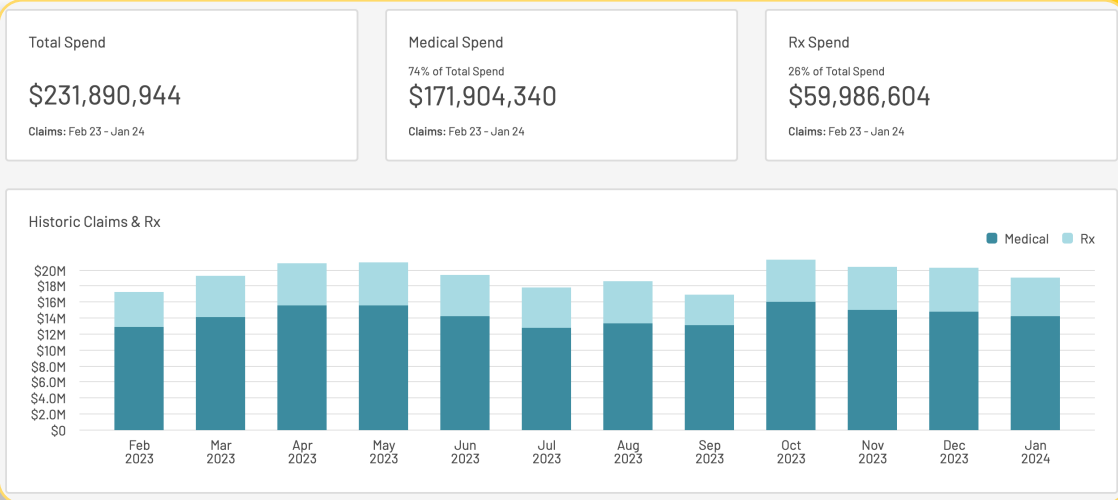

See your population’s health at-a-glance, monitor spend over time, identify gaps in care, forecast PMPM spend, and more on the Health HQ page. Use the intuitive date filter and conditional filtering to narrow results to members with gaps in care or Type 2 Diabetes, for example.

Claims Identify & Understand Population Trends

Need to dig deeper into claims details to better understand your top cost drivers? The [Claims page](#) gives you the ability to ask complex questions that help create strategic plans that improve population health:

- › View Rx claims separately from Medical Claims; analyze claims by diagnosis, procedure, or drug name
- › See claims scoped with the time period of your choice
- › Sort by unique members, number of claims, or percent of total spend

Analyze

Gaps in Care

Quickly Analyze Evidence-based Medical Guidelines

The [Gaps in Care](#) dashboard helps you analyze specific chronic conditions and unaddressed preventive measures impacting your population.

- › Visualize compliance data over time for a condition or a specific gap guideline
- › Create focus population cohorts of non-compliant members to track their progress over time
- › Download member information into a spreadsheet for use outside of the platform

Compare

Taking your analysis beyond just key metrics and data points, the Compare tab is designed specifically for comparison and analysis of subgroups of the population, helping to understand data at the next level.

Springbuk Timeline™ Easily Measure the Impact of Interventions

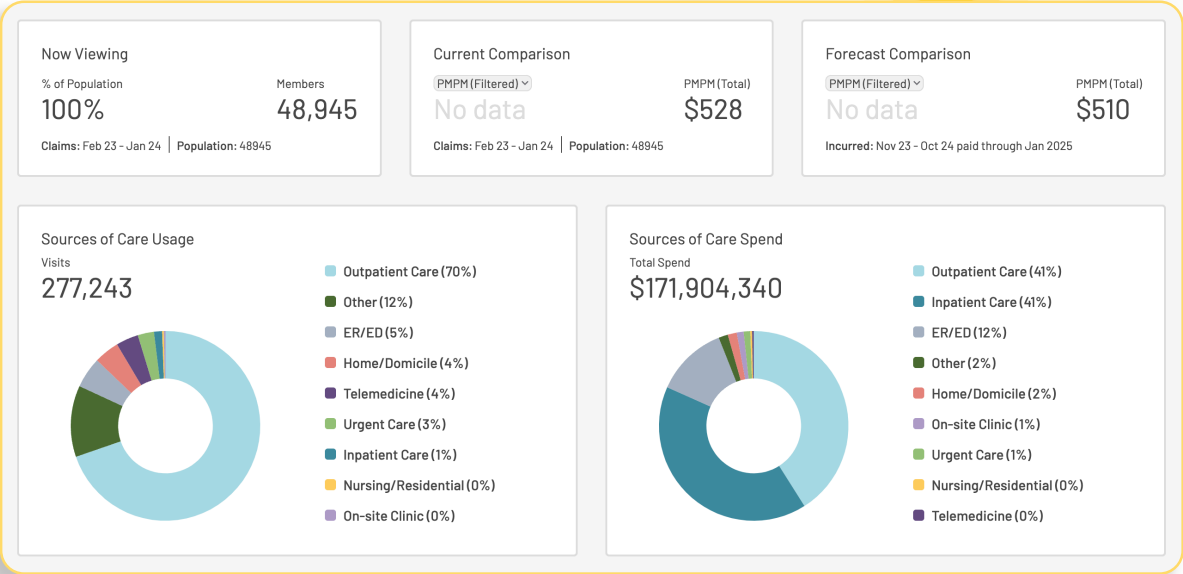

See and tell the story of the interventions that have driven the greatest impact for your population's health with [Springbuk Timeline](#).

With the power of Timeline, you can associate actions, opportunities, and events with changes in meaningful outcomes. For the first time, you can visually show the impact of programs and strategies implemented by comparing metrics against your recent actions.

Health IQ™ Quickly Visualize Utilization & Spend Insights

Health IQ gives you the ability to compare a filtered population, segment, or focus population against the entire population on a current and forecasted timeframe. While our platform defaults to Per Member Per Month as our standard metric, you can filter these comparisons to Per Employee Per Month, Per Member Per Year, or Per Employee Per Year.

Compare

Benefit Plans

Optimize Plan Impact & Improve Employee Health

The Benefit Plans page provides users a clear understanding of the demographic and financial makeup of their health plans as well as highlighting the factors driving its costs.

Reports

The Springbuk platform was built to allow all the visualization cards throughout the application to be dropped seamlessly into custom-built reports. Combined with Springbuk’s Tableau integration, Springbuk offers everything you need to extract important data.

Report Library

Tell the Story of Your Data with Springbuk Reporting

Springbuk has pre built over 25 canned reports in our application. You can slice and dice each report just like you would in any dashboard or page of our platform. You can duplicate our canned reports to add your logo and/or make them your own. These can be shared across any user within Springbuk.

Advanced Reports

Flexible & Customizable Data Visualization

Analysts can add their own touch to reports with the robust, easy-to-use features in [Springbuk Advanced Reporting™](#). This provides you with access to the raw data to slice, dice, and build custom reports in a more traditional data warehouse environment, offering you further flexibility, accessibility, and customization needed to make important data-driven decisions.

We know that to improve your members’ health, you need a solution that can empower faster, more informed, more impactful decisions on benefits strategy and spend.

Go beyond traditional data warehousing and analytics by delivering strategies with Springbuk. Meet with a Springbuk representative today to learn how health intelligence can optimize workforce health investment decisions in your population.
